

Widex Framework Draft

draft-stirbu-widex-framework-02.txt

Vlad Stirbu, Dave Raggett

10.07.2006

IETF 66, Montreal

Progress Update

- Major updates on Widex Framework definition
 - Which events with remote scope
 - Clarifications on event listeners
 - Clarifications on networked MVC model
 - real vs. virtual View

Progress Update

- Three ways to indicate which events have remote scope
 - prior agreement
 - negotiation at session setup
 - the Widex Server could direct the Widex Renderer to add and remove event listeners during the session

Progress Update

- New WO.Selector message
 - used by Widex Server to indicate to Widex Renderer that an event has remote scope
 - add and remove event listeners during the session

Progress Update

- Processing External Resources
 - References to external resources
 - Synchronisation with external resources

Next Steps

- Add WO.* examples when W3C REX draft becomes public
- Add XML processing parameters to Service Discovery section
- Are some major things missing?
- Can we consider adopting the draft as a WG document?
