

SIMPLE Architecture draft

IETF 57

Vienna, Austria

draft-houri-simple-arch-01

- Informational draft
- Current Authors:
 - Avshalom Houri, IBM
 - Tom Hiller, Lucent
 - Tony Hansen, AT&T

Why?

- Charter item of the group
 - An architecture for the implementation of a traditional buddylist-based instant messaging and presence application with SIP.
- Very needed in order to strengthen the position of SIMPLE

Status

- Very preliminary state. We are working on it...
- Table of content covers a lot, probably too much
- Comments on structure and what is really needed are more than welcome

Thanks
