Recent Discussions

- Request-URI vs. To
 - Consensus for using Request-URI
- Suggestion to include text discussing etags in more detail
 - How used, managing etags, etc.

Open Issues

- Should PUBLISH talk about rate of publication?
 - Similar to SIP events notification rate
- Suggestion: Yes.
 - Inherit minimum time between publications from the particular event package?

Next Steps

- Revision -02 due out shortly after IETF58
 - Mostly bug fixes and clarifications
- No known major issues left
 - We are ready for WGLC
