SIP-SAML draft

- No revision for this IETF (-04 is current)
- Need to flush out mechanism a bit
  - Current proposal to discuss: SAML-Assertion header
- We do have an application of this mechanism that will be discussed later
  - SAML for SPIT
  - This is important as a potential use case for SAML in SIP
- We have a charter item for using SAML in SIP
  - Is this it?
  - If so, WG item status?
